Sigma is developing the Grota do Cirilo project in the Jequitinhonha Valley in Minas Gerais, with a total

investment of 3 billion reais (\$634.1 million), and has just started the company's first shipment. Cabral ...

Liquid Metal Battery Corporation (LMBC) is an early-stage company working to develop and commercialize a new battery technology that will revolutionize grid-scale power storage. Our battery has the potential to cost significantly less than existing batteries.

Unlike rival technologies, Liquid Metal batteries have minimal degradation and can last for over 20 years. They are not only extremely reliable but also safe - as they do not produce or emit any gases and have no possibility of thermal runaway.

Sigma is developing the Grota do Cirilo project in the Jequitinhonha Valley in Minas Gerais, with a total investment of 3 billion reais (\$634.1 million), and has just started the company's first shipment. Cabral-Gardner said the company is studying the feasibility of a ...

According to Briggs, the company's liquid metal batteries also solve for all of the other chronic issues that have limited lithium-ion's ability to grow to real scale in power generation.

Together they envisioned that the Liquid Metal Battery will be a safe, affordable electrical storage solution that will change the way electric grids are operated worldwide. Our vision hasn't changed since we founded Ambri: we want to change the world.
