an energy storage system for Austria, based on #mission2030 - The Austrian Climate and Energy Strategy<sup>1</sup>, the ENERGY Research and Innovation Strategy<sup>2</sup>, the "Energy storage systems in and from Austria" technology roadmap<sup>3</sup>, the national battery initiative and the final report on the storage system initiative of the Climate and Energy Fund<sup>4</sup> ...

PEC is partnering with globally leading battery cell manufacturers to supply the equipment for their automated cell finishing lines. - Lab-to-Fab Solutions - Hyper-scale Production Capacity - Hybrid Cell Manufacturing

2019 PEC wins several new contracts in Automated Cell Finishing for large format automotive grade cells, including the UK's Battery Industrialisation Centre (UK BIC). 2018 PEC has been selected by 2 of Germany's largest OEM's to supply the technology for Cell Finishing, including soaking, formation, degassing, ageing and final testing.

Hybrid Cell Manufacturing is the (only) way to gradual ramp GIGA scale battery cell production in a cost-effective way. PEC's breakthrough development in Rapid Single Step electrolyte filling enables Hybrid Cell production as a step-by-step implementation of GIGA factories.
