

Are solar panel awnings a good investment?

Solar panel awnings or canopies can be a great addition to your home. They can easily add a fantastic looking outdoor living space, providing both shade and an aesthetically pleasing structure to your property, increasing your property's value as well.

Can you put solar panels on a roof?

Most small-scale solar installations go on the roof, but not every roof is ideal for solar. Luckily, if you have a suitable space, there are plenty of other system designs that you can use for your solar panels. These include ground-mounted solar systems, solar carport, and solar trees - now you can add solar patio covers and gazebos to that list.

Can a PV awning replace a planned architectural shading element?

We worked with Power Structures to create a PV awning that replaced a planned architectural shading element on a new home. Not only did the new PV array provide the needed shading to summer fenestration, but provided 4.8kW of power to boot- all at a cost REDUCTION from what was initially planned.

Who is power structures awning?

The Power-Structures Awning solution was developed by a designer/solar installer with 35 years of experience in the architecture, construction and solar industries. We have taken the guess-work out of designing an awning, giving you a beautiful solution delivered to your home or office.

Can stainless steel awning panels be attached to a Bimini?

Screwing Down & Tying Down With the stainless steel rivets along the perimeter of the panels, these can easily be tied down to the bimini of a boat or even set up over a flexible awning. But these points could also be used to screw directly into a roof surface, just like the rigid panels.
