What is a pafbag solar panel lifting bag?

The unique design of the Pafbag solar panel lifting bag offers innovative features to enable solar panels and other frame type loads to be lifted with speed and efficiency. With a maximum safe working load of 500kgit is often the case that more than one panel can be lifted together. LEAD TIME APPROX. 7 WORKING DAYS

What is the best solar panel lifting bag?

The PafBag 240is the original Solar Panel Lifting Bag and still the best,offering you years of efficient lifting when lesser bags have fallen apart and become dangerous. Its unique design enables it to be quickly loaded through either end in seconds whilst still attached to, and tensioned by the lifting rope.

How much weight can a solar panel lifting bag handle?

Our own (blue) solar panel lifting bag measures 2200mm long and can handle loads to 200kg; whilst the red Pafbag version is slightly longer at 2400mm and can handle up to 500kg. Both options have incorporated lifting slings, although with the Pafbag model it is not stitched permanently but threaded through a channel thus replaceable.

Should you invest in a solar panel lifting bag?

However if you invest in a solar panel lifting bag your panels will be covered in a protective layer of strong, high density polyester, padded material so protection from bangs and knocks from other obstacles on its journey to the roof will be greatly minimised.

What lifting bags do Plumbers use?

Choices include plastic tub/trug or bucket lifting bags,and tube lifting bags,great for plumbers piping. Check out our extensive collection of lifting bags,they make lifting a whole lot easier whilst requiring minimal storage space. Lift Solar panels the easy way with Pafbag solar panel lifting bags.

How to lift solar panels up high?

Besides our solar panel lifting bags you will find some other products that will help to get the panels up high to where they are needed. A ladder winch (sometimes called a ladder hoist) with particular fittings to hold the panels are often used on lower buildings. However they offer little protection to the panel itself.
