

What are solar panel import tariffs?

Solar panel import tariffs are primarily intended to support the development of a new U.S.-based solar module manufacturing supply chain, which is financially backed by the Inflation Reduction Act. This act introduces a series of tax credits designed to bolster domestic manufacturers. For solar modules, the credits are as follows:

What happened to solar panels after Biden paused tariffs?

In the two years since the Biden administration made the decision to pause the tariffs, solar prices have cratered, and solar panel imports have surged.

Are solar imports from Southeast Asia unfairly benefiting from government aid?

Those nations provide the bulk of US solar cell and module imports. The announcement comes nearly two months after the US agency issued preliminary findings from a separate but related probe that the solar imports from Southeast Asia are unfairly benefiting from government aid.

Why are photovoltaics becoming more popular in Europe?

This is exemplified by the current war in Europe, which was precipitated by Russia using its gas resources to slow the continent's response to its invasion of Ukraine, leading to a massive increase in the adoption of photovoltaics across the continent.

Which companies are pursuing a solar trade claim?

Companies pursuing the latest claims as part of the American Alliance for Solar Manufacturing Trade Committee include First Solar Inc., Hanwha Qcells USA Inc., and Mission Solar Energy LLC. [Read More: Climate Fight Is Too Costly Without China, Says Xi's New Envoy](#)

How have Chinese manufacturers responded to US solar tariffs?

Chinese manufacturers have responded to U.S. solar tariffs by moving their massive operations to nations where they will not face duties- including Southeast Asia.
