

What types of warranties cover solar panels?

There are two basic types of warranties that cover solar panels. A product warranty protects you from defects in a solar panel stemming from material quality or manufacturing errors. This is also referred to as an equipment or materials warranty

Can a solar panel warranty be voided?

For example, warranties may be voided if the solar panels are not installed according to specified guidelines or if unauthorized modifications are made. Certain solar panel warranties might not cover fire damage or other outside sources.

What is a performance warranty on a solar panel?

A performance warranty guarantees a maximum level of degradation- typically between .25% and .75% - per year so that in 25 years the panel will still have 80-90% of the power output it did in its first year. Performance warranties are important for sizing solar systems to maintain 100% offset for 25 years.

Which solar panel manufacturer has the best warranty coverage?

There are a few manufacturers that go above and beyond with their warranty protection. SunPower is, by far, the best solar panel manufacturer in terms of warranty coverage for its products, and Tesla is another excellent provider that has above-average coverage overall. Some of the best warranties come from the following manufacturers:

Should I get a warranty on a solar panel system?

A solar panel system is a multi-decade investment that a warranty can help protect. The less solar power your system produces, the more your home may need to draw from the utility company, which eats into your savings.

How long does a solar installation warranty last?

Installer performance guarantees can last between 5-10 years and the specifics vary by company. Finally, if you go solar through a marketplace like solar.com, you may also be covered by another layer of warranties. For example, solar.com offers a TriGuard Guarantee. This marketplace warranty includes:
