

Piller's rotary UPS systems (patented UNIBLOCK range) represent the highest quality and most reliable power supply for critical applications. The systems are available with battery, flywheel energy storage device or integrated diesel engine in a ...

Our offerings span kinetic energy storage systems, ground power units and 50/60Hz frequency converters. Boasting 7000+ kinetic energy storage devices and 6000+ rotary UPS units (up to 3600kVA) installed globally, our dedicated team of 300+ service technicians serve clients in ...

Established in 1909, Piller Power Systems is Europe's leading producer of uninterruptible power supply (UPS) systems for mission-critical power applications such as data centres and semiconductor manufacturing. Piller also manufactures ground power systems for civil and military airports and on-board electrical systems for naval vessels.

Piller is a world leader in power protection as well as power conditioning technology and occupies a unique position, being the only company to produce a wide range of rotary microgrid and island-grid stabilisers, advanced electrically coupled UPS technologies, encompassing kinetic energy storage systems or batteries, ground power units and 50 ...

Piller manufactures high capacity rotary UPS, hybrid rotary UPS, diesel rotary UPS, static UPS and. static transfer switches. For 400Hz, aircraft ground power and 50/60Hz frequency conversion, Piller frequency converters are widespread in both military and civil applications.

Piller is a world leader in power protection as well as power conditioning technology and occupies a unique position, being the only company to produce a wide range of rotary microgrid and island-grid stabilisers, advanced electrically ...

Piller is a world-leading producer of power conditioning equipment and uninterruptible power supply (UPS) systems to mission-critical power applications. Under the Power Solutions Division banner Piller solutions for Microgrids provide vital frequency and voltage stabilisation and grid gate technology that protects against outages in Microgrids ...

Piller's rotary UPS systems (patented UNIBLOCK range) represent the highest quality and most reliable power supply for critical applications. The systems are available with battery, flywheel energy storage device or integrated diesel ...

Piller Power Systems has successfully implemented advanced UPS technology at a prominent North American semiconductor wafer manufacturing plant, as part of phase one of a major construction project. The company

supplied five UB-V 2700KW UPS units, providing over 12MW of protection to the critical load operating at 24KV Medium Voltage Level.
