

What will esogip do for Madagascar?

The ESOGIP will aid Madagascar's government to decrease energy loss, increase energy efficiency, raise the ratio of renewables in the domestic energy mix, develop its governance of the energy sector, and improve operational performance of Jirama, Madagascar's state-owned electric utility and water services company.

Does Madagascar have a strong energy network?

Of Madagascar's 27 million inhabitants, 63% live in rural areas according to data by the World Bank from 2018. This leaves the country with the difficult task of creating a stable, pervasive energy network in order to supply the majority of the population with electricity.

Does Madagascar have a high solar energy potential?

Due to its location, Madagascar has a high solar energy potential. As shown in Fig. 5, the Global horizontal irradiation is 2000 kWh/m². Almost all regions have more than 2800 h (350 sunny days) of annual solar radiation. In the west coast, solar radiation ranges from 4000 to 6500 kWh/m².

Why does Madagascar have a low rate of electricity?

Only less than 1% of this demand is supplied by other renewable energy sources. This high share of wood energy is explained by its accessibility and its low cost for the population. Madagascar has a low rate electricity access due to its high price and the insufficient quantity production. The national rate of electrification is only 4.7% only.

Which energy sources are used in Madagascar?

According to the energy inventory drawn up by the MEM⁴ and the study report of the CREAM⁵, wood energy has the highest share (92%) in the total energy supply in Madagascar, followed by fossil fuel (7%). Only less than 1% of this demand is supplied by other renewable energy sources.

Which energy sources will be used in Madagascar by 2020?

For those purposes, it is expected that renewable energy, mainly including hydropower, occupies a share of 53% of the energetic mix of Madagascar by 2020. 3.4. Ocean energy The use of marine energies can be considered for Madagascar and particularly with OTEC, wave power and tidal barrages.
