

A leading Swiss energy utility, SIG, is required by law to enhance its clean heat offering and renewables contribution to its 30 MW th district heat network in Geneva, while reducing natural gas import. Solar thermal is required to heat above 80°C the district network return flow in winter with limited irradiance, even when raining or snowing.

This solar power plant has a capacity similar to that installed on the "PlanetSolar" boat, which completed the first solar-powered circumnavigation of the globe between 2010 and 2012. ... (Switzerland). With a solar panel surface area of 530 m²;; PlanetSolar II has a capacity of 101 kW. Follow its production data in real-time! ---Output ...

Swiss Solar continues working on a plant for bifacial modules. 2021, the company plans to launch three production lines with a total capacity of up to 1.5 GW per year and to implement product certification. This decision was made due to an acute shortage of products. Even while doubling the production volume (as compared to 2020) and crossing ...

It is a one-of-a-kind power plant, installed in December 2019 by Romande Energie, the main supplier of electricity in French-speaking Switzerland. "We came up with the idea in 2012 over a coffee," recalls Guillaume Fuchs, project lead in wind ...

Axpo, together with IWB, has completed Switzerland's largest alpine solar plant at 2,500 meters above sea level. The plant is fully operational since the end of August 2022. The pioneering AlpinSolar project produces 3.3 gigawatt hours ...

This high-altitude solar power plant sits in a stunning location, floating on a lake in between the Swiss Alps. ADVERTISEMENT This reservoir doubles as a floating solar power plant, smack back in ...

Switzerland's largest alpine solar installation is fully operational since the end of August 2022. The alpine system, located on the Muttsee dam at 2,500 metres above the sea level, is producing around three times more ...

In 1996, the Mont-Soleil site also hosted Switzerland's first wind power plant. In 2017, the new visitors' pavilion was inaugurated, giving a new breath to the guided tours of the solar power plant and wind turbines. These tours allow visitors to learn more about renewable energy and how the power plants work.

23.11.2023 - Following the full commissioning of Switzerland's largest alpine solar plant to date in the municipality of Glarus Süd in August 2022, Axpo now plans to build a 10 MWp solar plant in the same region. The plant is intended to provide essential winter electricity and add value to the community. With this

sixth alpine solar project ...

Switzerland's Federal Office of Transport (FOT) has authorized the installation of the country's first removable solar power plant between railway tracks, paving the way for a series of pilot projects both in Switzerland and abroad.

The energy transition depends on the expansion of renewable energies everywhere. Large-scale solar plants will play an increasingly important role in this process, both on the mountains and, in future, Switzerland's Central Plateau. In the mountains, solar plants supply a particularly large amount of winter electricity because:

Gondosolar Solar PV Park is an 18MW solar PV power project. It is planned in Valais, Switzerland. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the permitting stage. It will be developed in a single phase.

Rent fractions of solar plants, generate Guarantees of Origin and make profit. Book a free consultation. our solution. Transform expensive Scope 2 emission reduction into a profitable opportunity. ... *Data based on DEC's first PV plant ...

01.09.2022 - AlpinSolar, the largest alpine solar plant in Switzerland, is now fully operational. During the winter months, the plant, 2,500 metres above sea level, will produce about three ...

Now we are building Switzerland's largest alpine solar plant at 2500 metres above sea level. From autumn 2021 the pioneer project AlpinSolar will produce 3.3 million kilowatt hours of electricity ...

VARO Energy Group ("VARO") and Groupe E, companies active in the energy transition, announced today that they will build the most powerful ground-mounted solar facility in Switzerland. 19,000 photovoltaic ...
