Will Portugal's solar project accelerate its energy transition?

This is our largest solar project in Europe, a source of energy Portugal should significantly harness to accelerate its energy transition. At EDP, we are looking at dozens of new solar projects that will make a significant contribution to this path," highlights Duarte Bello, EDP Renewables Chief Operating Officer for Europe & LatAm.

Should Portugal add solar to its energy mix?

If Portugal is efficient by adding new solar generation quickly, it will accelerate decarbonization and it will contribute to reduce electricity prices. There really is so much potential for solar within the energy mix.

How much solar power does Portugal have?

The Cerca photovoltaic plant begins operation, delivering the renewable capacity assigned to EDP Renewables in Portugal's first solar energy auction. The project has a 202 MWp capacity, sufficient to power nearly 100,000 households. EDP now owns 540 MWp of solar capacity in Portugal, a technology crucial for the country's energy transition.

Is solar a good investment for Portugal?

Miguel Lobo, Country Head Portugal for Lightsource bp comments, "Solar is ideally placed to meet Portugal's rapid expansion plans on growing its local renewable energy generation capacity as it has excellent irradiation levels, it is quick to deploy, and low-cost.

How big is Portugal's solar capacity by 2022?

How come Portugal's cumulative solar capacity by the end of 2022 (2.59GW) was smaller than the annual capacity additions that Spain (3.4 GW) and not-that-sunny Netherlands (3 GW) managed to add that year? Boasting the highest solar radiation in Europe, Portugal has huge PV potential.
