For off-grid solar systems, off-grid inverters don't have to match phase with the utility sine wave as opposed to grid-tie inverters. Electrical current flows from the solar panels through the solar charge controller and the battery bank before it is finally converted into AC by the off-grid inverter.

The energy is generated directly from sunlight using specially built solar photovoltaic systems that constitute an inverter, mounting frame, cable and solar photovoltaic panels. The growing number of people embracing solar power in Bermuda and other countries are enticed by the many benefits it offers.
