Power Systems, Inc. (PSI) was established in 1983 and has been a leading provider of diesel engines and power generation systems. For over four decades, the company continues to serve the Mining, Marine, Construction, Industrial, ...

Power Systems Research is the leading source of global production, forecast, and population data for equipment and vehicles powered by IC engines, electric, and hybrid powertrains. Our Expertise PSR analysts collect and analyze ...

Piller's stabilisation and storage systems make it possible to optimise the various power sources in a microgrid, thereby reducing investment and operational costs. The combined offering itself will ensure flexible, reliable and cost-effective power supply 24 hours a day, 7 days a week.

In February 2022, Fossil Power Systems (FPS) became part of the Babcock & Wilcox (B& W) family of steam generation and emissions control technologies. The acquisition is a natural extension of the long relationship the two companies have had since 1987 when B& W began serving as the exclusive supplier of FPS ignitors in the U.S.

Power Systems Research EMEA (Europe, Middle East, Africa) is the leading source of information on engines and power equipment in this diverse and growing region. We have the broadest and deepest knowledge of the power product markets available for EMEA, which provides our customers with the best opportunity for growth.

L'isola Bouvet si trova a una latitudine di 54°26' S e a una longitudine di 3°24' E. Occupa una superficie di 58,5 km², ed è quasi interamente coperta da ghiacciai. Non ha porti né approdi, solo ancoraggi al largo, ed è difficile da approcciare. I ghiacciai formano uno spesso strato di ghiaccio che si getta con alte pareti nel mare o sulle spiagge nere di sabbia vulcanica.

Power Systems Research (PSR) is an international research company based in St. Paul, Minnesota, USA. It operates a second North America office in Detroit, Mich., and has offices in five other countries.
