Like all PowerBox Battery types, the PRO version features a fully integrated charge circuit and balancer unit. To charge these packs all you need is to connect the integral charge socket to a 110 V / 220 V mains PSU or a 12 V car adapter.

Battery is one of the most important parts of any vehicle as it provides electricity to the spark plugs which allow the engine to start. Batteries do not really show signs of deterioration until the vehicle fail to start - this can be really disturbing most of the times.

The PowerBox Pioneer is the latest development of a 14-channel power supply unit without voltage regulation, designed for HV servos. Since the unit has no voltage regulators, nor the large heat-sink surfaces required for them, it offers ultra-compact dimensions. Even so, the Pioneer still provides redundancy, as is the standard for all power supply units made by PowerBox-Systems.
