

Price of solar panels per square meter New Zealand

How much do solar panels cost?

Solar panels are a cheap and cost-effective solution for powering your home. For as little as \$8,000, you can get a 3kW solar power system in your household - and it comes with free installation too! If you want to save on your power costs in the long run, then don't wait any longer and install solar panels in your home!

Are solar panels worth it in NZ?

You just need to install solar panels and then purchase a solar battery (where the energy is stored). While it may take some time and investment to properly install the solar panels, it's definitely worth it in the long run! The good thing about solar panel systems in NZ is its availability nationwide!

How much does a solar system cost per watt?

Like most other things, the larger a system, the lower its cost per watt. For instance, a small, 2 kW system may cost around \$7,500, which comes down to about \$3.75/W. On the other hand, a larger, 10 kW system can cost around \$25,000, or about \$2.5/W. Let us dive a little deeper.

How much does a 10 kW solar system cost?

On the other hand, a larger, 10 kW system can cost around \$25,000, or about \$2.5/W. Let us dive a little deeper. While solar panels steal most of the spotlight in any system, they are only one of the numerous components that make up the system. A typical solar power system consists of the following:

What are the different types of solar panels in NZ?

Polycrystalline solar panels are probably the most common type of NZ solar power panels. They are also the cheapest type of solar panel to make and therefore have one of the lowest revenue per kWh numbers in front of them. The positive side is that their low cost makes them very popular solar panels. Monocrystalline Solar Panel

Do roof-mounted solar panels cost more?

Even for roof-mounted panels, the cost decreases if they are laid flat on the roof instead of installing them at an angle. In certain cases, customers can have custom requests which can also increase the cost of the solar mounting structures. For instance, a solar carport for parking and charging EVs will cost more than a regular rooftop system.
