Our Client friendly approach and comprehensive engineering solutions to address specific project needs the state-of-art solar technology, from Concept to Completion, with state-of-art renewable energy technology to ensure top quality products and services to our clients.

On January 24, the New Jersey Board of Public Utilities approved two massive offshore wind projects: 2,400 MW Leading Light Wind and 1,342 MW Attentive Energy Two. According to the BPU, the two projects will raise the cost of electricity by "only" \$6.84 per month for a typical residential customer,

As New Jersey pursues the addition of 11,000 megawatts of offshore wind by 2040, Invenergy's Jersey Link project is an innovative, scalable, and comprehensive High-Voltage Direct Current (HVDC) transmission solution that will allow for the integration of up to 3,600 megawatts of new offshore wind into New Jersey's grid, powering millions of ...
