

How much coal does AES use in Puerto Rico?

Both units are subcritical and rely on bituminous coal for energy production; AES currently imports around 1.7 million tonnes of coal from Colombia to fuel the plant. The company AES currently supplies 25% of Puerto Rico's consumed energy.

Where is AES Puerto Rico Power Station?

AES Puerto Rico power station is a 510-megawatt (MW) coal-fired power station in Guayama, the state of Puerto Rico, United States. The map below shows the location of the power station in Guayama, the state of Puerto Rico, United States. Your browser is not compatible with Google Maps v3.

Who is developing Puerto Rico's energy grid?

Development is led by Clean Flexible Energy, an indirect subsidiary of AES Corp. and TotalEnergies Holdings USA. A conditional loan guarantee was announced for the project in July. Puerto Rico is aiming to eliminate coal-fired energy generation by 2028 and develop a 100% renewable energy grid by 2050.

What is the Puerto Rico energy Resilience Fund?

The President authorized \$1 billion for the establishment of the Puerto Rico Energy Resilience Fund in 2022 to drive investments in renewable and resilient energy infrastructure on the island. A community benefits plan required by DOE "is being finalized and will be released to the public soon," the agency said.

Can AES deposit coal ash in Puerto Rico?

Although AES pledged in 1996 (before the plant's commission), that it would not deposit coal ash in Puerto Rico's landfills, in 1998, three petitions from Puerto Rican citizens were filed against the original permit for AES challenging the permit issued by the EPA to AES Puerto Rico. All of the petitions were denied review by the EPA.

What happened to Puerto Rico's electricity grid?

A worker installs rooftop solar panels on a home in Puerto Rico. The island's electric grid was destroyed by Hurricane Maria in 2017, resulting in a plan to modernize and decarbonize. Courtesy of Sunrun This audio is auto-generated. Please let us know if you have feedback
