

# Replacing residential roof with photovoltaic panels

Should you choose solar during a roof replacement?

That isn't the only way you'll save by choosing solar during a roof replacement. Solar panels last about 25-30 years, which is similar to the lifetime of a roof. By doing both at the same time, you avoid needing to have your solar panels re-installed after replacing your roof, which can save money in the long-run.

What is a solar panel roof?

When we talk about solar panel roofs, we usually picture traditional solar panels mounted on the roof, capturing sunlight through photovoltaic cells and converting it into electricity. However, there's also another option: solar roof tiles also called solar shingles.

Can I install a new roof if I have solar panels?

Though you can install a new roof while panels are installed, the process of installing a new roof on a roof that already has solar panels is straightforward: Contact the roofing company. It'll assess the solar panel installation, do a roof inspection, and provide options for what type of roofing will work with your specific solar panel system.

Can a roof support solar panels?

Make sure your roof can support solar panels. A solar installer, roofing expert, or structural engineer can help you determine your roof's solar suitability.

How much does it cost to replace a roof before solar?

If you have an asphalt roof over 5-10 years old, you'll probably want to replace it before going solar. Replacing your roof and installing solar costs about \$30,000. If you need to replace your roof after you install solar panels, expect solar panel removal and reinstallation to cost anywhere from \$1,500 to \$6,000.

How do you remove solar panels from a roof?

Contact the roofing company. It'll assess the solar panel installation, do a roof inspection, and provide options for what type of roofing will work with your specific solar panel system. Contact the solar panel installers to remove the solar panels. Roofing companies don't do removal. The installers will know how to disconnect solar panels.
