

Is re a solution to energy problems in the Gambia?

Policy makers across africa have been among the last to embrace Re as a solu-tion to their energy problems. They are often locked into crisis management on a day-to-day basis. The country's policy makers need to be persuaded that Re has a real futurein the energy mix of The Gambia. They need to demonstrate this by their actions.

Can communities benefit from renewable electricity support in the Gambia?

Communities who do not have access to the electricity network are one of the main groups with potential to bene-fit from renewable electricity support. however, community investment in the Gambia presents serious challenges. it is difficult for communities to access finance and develop the skills and knowledge required.

Are solar resources in the Gambia a good investment?

Solar resources in The Gambia are excellent,and thus offer the opportunity for deploying a range of solar technologies at utility-scale plants and distributed end-use applica-tions.

Will re be a part of the Gambia's energy future?

The Gambia has already started this process by setting up a strong policy that includes Re as part of its energy future. it is in the process of building the institutional and legal framework that will help to deliver this promise.

Does the Gambia have a wind-related energy project?

There is limited experiencein wind-related energy projects in The Gambia. much of the early work was restricted to village water pumping projects. in the 1990s,the Department of Water Resources (DWR) actively promoted the use of wind pumps along coastal villages with support from the eU.

Can solar water heating save energy in the Gambia?

Water heating is a major consumer of energy in The Gambia - mainly in hotels,clinics and some households. Significant savings can be madeif hotels and other large institutions are able to capitalise on the energy savings opportunities from solar water heating systems,which have been around for several decades.
