

OverviewGovernment supportHistoryProjectsSee alsoExternal linksThe Romanian State supports the production of solar / PV energy by offering six (6) green certificates for each MWh produced and injected into the grid. One green certificate will be traded on a regulated market (i.e. OPCOM) with a price that varies between EUR 27 to EUR 55 per green certificate, subject to indexation with the Euro zone inflation rate. However, due to the reduction of the cost of technology, the Romanian Energy Regulatory Body (i.e. ANRE) conside...

photovoltaic projects, the prosumer area has become one of the most dynamic areas in the energy sector in Romania, due to the unprecedented increase in electricity prices and the need to transition to a cleaner and more sustainable energy system. The number of prosumers reached 110,355 at the end of 2023, an increase of about 70,000

3 ???· The largest photovoltaic panel system in Romania installed on the roof was implemented at the Kronospan factory in Sebes, the project value being almost 51.17 million lei, the company's representatives announced in a press conference held on Friday in Bucharest. The "Kronospan Sebes Photovoltaic Panel System" project is co-financed by the National ...

Nowadays, Romania remains a major force in the industry of solar power, with solar installations dating back to the early 1970s already being established. Today, let's list 20 of the most notable solar projects found throughout Romania, some operational, and ...

A total of 60,000 households in Romania will be able to benefit from funds for installing photovoltaic panels and batteries, as well as funds for increasing the energy efficiency of homes,...

3 ???· The largest photovoltaic panel system in Romania installed on the roof was implemented at the Kronospan factory in Sebes, the project value being almost 51.17 million ...

Romania has set an ambitious target to install over 8 Gigawatts of solar energy capacity by 2030, which is anticipated to constitute 24% of its gross final electricity consumption from renewable sources.

A latecomer to the European PV party, Romania's embrace of clean energy means it is perfectly placed to ride the wave of urgently ramped grid investment being rolled out by the European Union.
