Como un faro luminoso de la sostenibilidad y la economía circular, RUBIX ENERGY GROUP redefine la manera en que se aborda el reciclaje de plástico. En un mundo donde la contaminación plástica es un desafío urgente, esta empresa se destaca al convertir lo que solía ser desechado en una fuente valiosa de material reciclado.

Industrial motor-driven systems - including compressors, pumps and fans - are typically only around 36% efficient. With the right interventions, they can be optimised to hit 72%. This cuts energy waste, reduces cost and limits emissions. At a time when the energy crisis threatens to slow - or even reverse - progress on environmental and ...

Working at Rubix. Our people help our clients overcome their challenges. Our people provide the technical expertise and industry understanding our clients need to overcome their challenges and keep their businesses running smoothly. Find out more. Our customers. Our customers; Challenges we solve; Adding value;

Our sustainability mark. The sustainability mark is a tangible demonstration of Rubix's commitment to driving progress towards our targeted environmental UN Sustainable Development Goals: SDG 7, Affordable and Clean Energy; SDG ...

Rubix's technical specialists visited the site twice and offered a solution which involved fitting inverter drives to each of the motors (20 Air Handling Units with 2 motors each). Along with isolating some fans, the biggest energy saving opportunity was to reduce the fan speeds.

Nauru: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
