

Rural solar power generation financing lease

Does leasing land for solar farms pay off?

Landowners and communities throughout North America are seeing first-hand how leasing land for solar farms and other renewable energy projects pays off. Allocating a portion of your land to lease for an energy project opens up a diversified and dependable income stream.

What is the rural energy for America Program (REAP)?

With the passage of the Inflation Reduction Act, the Rural Energy for America Program (REAP) has been provided over \$2 billion for renewable energy systems and energy efficiency improvement grants for agricultural producers and rural small business owners through 2031.

How long does a solar farm lease last?

Solar ground leases can last between 15 and 30 years, with most lasting around 20 to 25 years, which coincides with the useful life expectancy of solar PV panels. What annual payment will I receive in exchange for granting the option to use this land for a solar farm (what payments will be made prior to the start of any solar project)?

Can you lease land for solar development?

Landowners in some regions are being approached with exploratory offers to lease their land for solar development. Solar developers may be in contact with a number of landowners to see if there is sufficient interest and land area to develop a project.

What is solar leasing?

Solar leasing is the process when a landowner sells the right to install and operate solar panels on their property. There are many details associated with these agreements, and they need to be fully understood before making any commitments.

Does proximity to solar farms deter agricultural sales?

Proximity to solar farms also has not been found to deter the sales of surrounding agricultural or residential land. Solar farm development acts as a tool to preserve existing agricultural lands and allow the soils to rest and renew for future reintroduction into agricultural production.
