How many solar panels are in a 3KW system?

3kW systems are small and usually have between 8 and 11 solar panels. The actual number of solar panels within a 3kW system depends on the wattage of the solar panels. Higher wattage panels are more efficient than their lower-wattage counterparts. Typical panels have wattages of between 275-400 watts.

A 3kW solar system will produce between 260-415 kWhs of electricity depending on sun exposure. The average cost of installing a 3kW solar system is \$9,000 but varies state by state. Yearly savings are different in each state but can be from \$300 to \$900 a year.
