The project is a collaboration between IGY and Prosolar Caribbean, a leading solar energy provider in the region. IGY installed a rooftop photovoltaic generation array that generates ...

Renewable electricity here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal power. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included.

The project is a collaboration between IGY and Prosolar Caribbean, a leading solar energy provider in the region. IGY installed a rooftop photovoltaic generation array that generates clean, renewable energy for the mixed-use property.

Solar Energy Caribbean offers reliable solar power solutions across the Dutch & French Caribbean, including Sint Maarten, Saint Martin, Saint Barthélemy, Saba, and Trinidad & Tobago.

MPCES will use the debt facility to construct a 66 MWp solar PV plant in Guatemala which will enter operations by mid-2025. The innovative transaction with BAC allows MPCES to grow its renewable portfolio and marks MPCES's continued commitment to the region.

Overall, off-grid solar systems can be a good option for homeowners in St. Barthélemy who are looking to save money on their electricity bills, reduce their reliance on the grid, and make their homes more sustainable.
