The NIS2 Directive, the European Union's updated framework for cybersecurity, is aimed at improving the resilience of critical sectors, especially utilities such as energy, water, and telecommunications. Utilities are

now recognized as a prime target for cyberattacks due to the essential services they provide.

San Marino - Energy and Mining Contains data from the World Bank's data portal. There is also a consolidated country dataset on HDX. The world economy needs ever-increasing amounts of energy to sustain economic growth, raise living standards, and reduce poverty. But today's trends in energy use are not sustainable.

CO 2 emissions are dominated by the burning of fossil fuels for energy production, and industrial production of materials such as cement.. What is the contribution of each fuel source to the country's CO 2 emissions?. This interactive chart shows the breakdown of annual CO 2 emissions by source: either coal, oil, gas, cement production or gas flaring. This breakdown is strongly ...

San Marino's economic performance has been remarkable over the last two years. However, higher energy prices --below neighboring countries-- weakening external demand and tighter international financial conditions will affect growth going forward. This challenging context combined with the rollover of the Eurobond, calls for further building up of ...
