

How do I Sell my solar panels?

Find a good location to sell your solar panels. If you are selling to homeowners, consider setting up a display at a local home improvement store or green fair. If you are selling to businesses, consider exhibiting at trade shows or business expositions that focus on environment-friendly products and services. Price your solar panels competitively.

What is an example of an online solar panel store?

One good example of an online solar panel store is Loom Solar, a Shopify-powered store that manufactures mono PERC solar panels and lithium batteries. Showcase your solar panels with professionally edited photos or build customer loyalty with rewards programs.

Are solar panels a hard sell?

Thanks to the rising popularity of solar energy in the U.S., it's not really a hard sell anymore. In fact, a Pew Research Center survey from 2019 found that 46% of U.S. homeowners had given serious thought to adding solar panels to their homes in the past year. Want to sell more solar panels? EagleView can help you

Is selling solar panels a profitable business?

Selling solar panels can be a lucrative business, but it requires more than just having a good product. You need to understand your target market, have effective sales strategies and be able to communicate the benefits of solar power in a convincing way.

How do you price solar panels?

Pricing solar panels depends on power capacity and quality. The best practice for pricing solar panels is to analyze your competitors and calculate your costs using Shopify's free profit margin calculator. What are some good examples of online solar panel stores?

How do I promote my solar panel business?

Promote your solar panel business through word-of-mouth marketing, online advertising, and traditional marketing techniques. Make sure potential buyers are aware of your products and the benefits of solar energy so they can make an informed decision about whether or not to purchase your products.

Panels are then placed parallel to each other and directly feed AC from the roof down to the house. Other systems place panels in series, so-called "strings", feeding one large inverter, that usually sits inside the house.
