

Can Senegal achieve universal access to modern energy?

In order to achieve universal access to modern energy, to spur industrialisation and consolidate a low-carbon, resilient and sustainable energy system, Senegal has recently joined the ranks of countries (South Africa, Indonesia, Viet Nam) having entered a Just Energy Transition Partnership (JETP).

What is Senegal's energy policy?

The IEA's Energy Policy Review of Senegal 2023, published today, finds that energy is at the heart of Senegal's 2035 strategy for accelerating sustainable development and economic growth known as the Plan Sénégal 2035, or the Emerging Senegal Plan.

Will Senegal's economy grow six-times bigger in the AC?

Senegal's economy could grow six-times larger in the AC while limiting growth in energy demand to three-times its current level by utilising new gas resources and boosting the use of renewables in power. In the AC, gas meets a growing share of energy demand while traditional use of biomass starts to decline in rural areas. IEA. Licence: CC BY 4.0

How has Senegal reformed its energy sector?

Since the launch of the Plan Sénégal 2035, Senegal has adopted reforms designed to attract foreign investment in its energy sector and boost participation from the private sector, while leveraging significant support from development finance institutions.

How will Senegal's power sector be strengthened?

Senegal's power sector would be strengthened by continued diversified investment in power, including renewables and natural gas, while phasing out heavy fuel oil. Senegal Energy Outlook - Analysis and findings. An article by the International Energy Agency.

Can Senegal achieve its broader economic objectives?

Senegal's significant efforts to develop its energy sector and deliver energy access to more people are laying important groundwork for the country to achieve its broader economic objectives, according to a new report from the International Energy Agency (IEA).

Senegal's climate is characterized mainly by three types of wind: The maritime trade wind, coming from the Azores High which is from the NW; SE direction and the continental trade wind (also
