

What is the energy storage system in the Seychelles?

The project includes an energy storage system with a capacity of 5MW and 3.3 megawatt-hours(MWh),allowing for the safe and stable supply of electricity from the PV power plant to the main island of Mahé; and further increasing the resilience of the national grid of the Seychelles.

Does Seychelles have a 5MW solar PV plant?

The Republic of Seychelles has inaugurated its second clean energy project, a 5MW solar PV plant with battery storage. The Republic of Seychelles has inaugurated its second clean energy project, a 5MW solar PV plant with battery storage.

Where are the solar power plants located in the Seychelles?

The facilities include the 5MW solar PV plant located in Ile de Romainville,a 3.3 MWh energy storage system located on Mahé; and a 33kV system that allows for the safe and stable supply of electricity from the PV power plant to the main island of Mahé;. This system helps increase the resilience of the national grid of the Seychelles.

How much energy will the Seychelles save a year?

Planning law in the UK has been changed to allow energy storage projects over 50MW to come on line without going through the national planning process. This could pave the way for a major expansion of battery storage facilities across our towns and cities, to support green energy use in new builds and to balance our energy demand.
