The SNU is a true point of use water heater designed especially for isolated sinks or in locations where the sink is located a long distance from the central hot water system. Installed directly at the sink these compact water heaters deliver immediate hot water, so long wait times are a ...

STIEBEL ELTRON SHC mains pressure storage water heaters are designed for point of use installation and can serve multiple outlets at the same time. Compact in size, the system is ideal for where space is limited .

The SHC 15 only uses 0.53kWh of energy on standby (24 hours at 65°C), making this a great energy-saving unit. Don't wait too long for hot water, this compact water heater from Stiebel Eltron will rapidly deliver the water you need.

Made in Germany, the STIEBEL ELTRON SHC 15 AU under bench mains pressure water heater delivers hot water quickly to multiple sinks or basins. These point-of-use water heaters eliminate long runs of pipework for isolated sinks and basins and can greatly reduce the waiting time for hot water to arrive at the outlet.
