

What does shell energy do?

Under the Shell Energy brand, we provide innovative, reliable and cleaner energy solutions through a portfolio of gas, power, environmental products and energy efficiency offers to businesses and individual customers.

Who is Shell Energy Solutions?

Shell Energy Solutions* is the business that offers retail power solutions, demand response and energy solutions to commercial and industrial customers. * MP2 Energy, d/b/a Shell Energy Solutions is a wholly owned subsidiary of Shell Energy North America (US) L.P. The Shell Energy Solutions Job Applicant Privacy Notice can be found [here](#).

Why is shell investing in oil & gas production?

We are also investing in oil and gas production with lower emissions as we provide energy today while helping to build the low-carbon energy system of the future. See how we are providing energy today while building the energy system of the future 1. What is Shell's Energy Transition Strategy 2024? 2. What is Shell's role in the energy transition?

What is shell's energy transition update?

Our first energy transition update since 2021 is an opportunity to take stock of our progress, to reflect on what we have learned, and to look forward as we transform Shell into a net zero emissions energy business by 2050. Our energy transition update shows how we are delivering against our climate targets.

Power your business with clean energy even when the grid goes down. Combining on-site generation with energy storage and microgrid controls, our platform allows you to keep your operations online - even if the grid is not.
