

What will Japan's new wind power auction entail?

All the projects will also feature GE 12.6MW hardware. The announcement marks the second set of results of government auctions for offshore blocks under a new law to promote wind power as Japan aims to boost renewable power capacity to help achieve its 2050 goal of becoming carbon neutral.

How many offshore wind projects in Japan?

Japan has held two offshore wind tenders to date. The first tender round for offshore wind projects concluded in 2021, with the same consortium led by Mitsubishi Corporation and Chubu Electric Power being awarded the occupancy permits for each of the three fixed-bottom projects Noshiro-Mitane-Oga (478 MW), Yurihonjo (819 MW), and Choshi (390 MW).⁵

Will Japan's offshore wind power market grow?

Japan's offshore wind power market is set to grow as the government aims to have 10 gigawatts of offshore wind farm deals by 2030.

When will Noshiro Mitane Oga & Choshi wind turbines be available?

Noshiro Mitane Oga will consist of 38 GE machines and is expected online by December 2028, while Choshi will have 31 GE turbines and is scheduled to be operating by September 2028. "This is the first bottom-fixed offshore wind power generation project in the general-sea-area in Japan.

How much wind power will Japan generate by 2040?

Wind power currently accounts for 0.9% of the energy mix in Japan. For wind to, as projected, meet 5% of the energy mix in Japan by 2030, there will consequently need to be a large number of new wind projects. To reinforce all of this, the government has also set a target to generate 30 - 45 GW of offshore wind generated power by 2040.

Did Foxwell energy get a contract for offshore wind power in Taiwan?

In 2020, Foxwell Energy's offshore wind power engineering division was awarded the "Offshore wind power phase II plan's property procurement and installation project" of Taipower, becoming the first Taiwanese company to obtain the EPC project and maintenance contract for offshore wind power in Taiwan.

Welcome to the Wind Power news review; hosted by Windpower Monthly's editor, Ian Griggs, and Windpower Monthly reporter, Orlando Jenkinson - along with our regular panellists, Shashi Barla and Will Sheard.

The Phase II Offshore Wind Power Project of Taipower. Tender Awarding Price: NT\$ 62.888 billion. Expected to complete grid connection by the end of September 2025. Foxwell Energy would be responsible for the O&M of the ...

In addition, the effects of this global growth on wind farm capacity, turbine-specific power capacity, number of turbines per GW, and area needed per GW are investigated and discussed in detail ...

Japan has announced three offshore wind farms totaling more than 1,760 MW in the country's first auction for fixed bottom projects - with all the development consortia led by Mitsubishi Corp.

Japan's industry and land ministries on Wednesday picked three consortia, including one featuring Germany's RWE and its partners, to operate offshore wind farms in the second round of a public ...
