How do solar panel cleaning tools work?

Generally speaking, solar panel cleaning tools consist of a long, telescoping (extendable and retractable) pole with a brush at one end and an easy-grip handle at the other. Some of these tools can be connected to a hose or outdoor faucet so that you can pump water through the pole and out at the brush end to enhance the tools' cleaning potential.

Can you clean a solar panel with a brush?

If you clean a solar panel with a hard brush, the intense abrasive force will likely scratch and damage the panel's surface. But apart from having soft brush bristles, an ideal solar panel cleaning brush should come with an extension pole that allows you to clean the solar panel safely from the ground.

Clean solar panels are key to efficient energy production and maximum panel life. SunSweep provides patented technology that makes cleaning easy and affordable for utility, commercial, and residential systems.
