

Should Singapore import low-carbon electricity?

In 2021, Singapore set its sights on importing up to 4GW of low-carbon electricity by 2035. Since then, it received over 20 proposals from multiple countries, demonstrating the viability of low-carbon electricity imports as a pathway for decarbonising the power sector, said EMA.

What's happening between Indonesia and Singapore on energy cooperation?

The progress of these seven projects builds on multiple memorandums of understanding (MOUs) between Indonesia and Singapore on energy cooperation, EMA said. The MOUs were signed in January 2022 and in March and September last year.

Can Singapore achieve net zero emissions by 2050?

Singapore aims to achieve net zero emissions by 2050. EMA said it will continue to engage companies with "credible and commercially viable proposals" that can contribute to its 2050 target. The companies granted a conditional approval by the Energy Market Authority on Sep 5, 2024, and their import capacity. (Image: EMA)

At Aeson Power we recognise and acknowledge the existing, original and ancient connection Aboriginal and Torres Strait Islander peoples have to the lands and waterways across the Australian continent. We pay our respects to the elders past and present. We commit to working together to build a prosperous and inclusive Australia.

In the dynamic landscape of renewable energy and power solutions, Australian-based Aeson Power stands out as a beacon of innovation and reliability. As a proud partner company of XuPai Group, Aeson Power has etched its mark on the industry with over 28 years of unparalleled expertise in power batteries, energy storage, and UPS batteries.
