

This document was developed by the National Renewable Energy Laboratory with support provided by the Caribbean Center for Renewable Energy and Energy Efficiency. The information included in this document is for general information purposes only.

This profile provides a snapshot of the energy landscape of the northeast Caribbean island Saint Martin. The island is divided between two nations, France in the north (Saint-Martin) and the Netherlands in the south (Sint Maarten).

The pilot program, targeted for a three-week rollout, will allow consumers to generate their own clean energy and contribute excess power back to the grid. The Minister also requested GEBE to propose, within two weeks, a competitive standardized Buy-back Rate for excess energy generated by participants in the pilot program.

renewable penetration and 100% heavy fuel oil free by 2030. Sint Maarten will work with GridMarket to identify, design, procure, and install distributed energy assets and make corresponding infrastructure upgrades. The scalable partnership model was developed to help the island rapidly reach its key energy goals by deploying an optimized mix of ...

energy situation for Sint Maarten. On sustainable energy: promoting access to secure, affordable, clean and sustainable energy services as a key driver for poverty eradication and inclusive growth, with a special emphasis on the use of local energy sources; fostering greater use of renewable energy technologies, energy efficiency and promoting low

PHILIPSBURG--Solar energy appears to be the best option for increasing renewable electricity in St. Maarten, according to TNO, which studied the energy transition in Aruba, Curaçao, and St. Maarten. TNO, founded in 1932, is established by law as the Netherlands Organisation for Applied Scientific Research, an independent non-profit research ...

Looking towards the future, NV GEBE intends to transition towards renewable energy sources. The company is exploring investments in solar and other renewable energy projects to diversify the energy mix and reduce reliance on fossil fuels. This long-term vision aligns with the government's global sustainability goals.
