

Using a solar battery can help users to reduce the amount of electricity they would normally buy during peak hours. The battery can store the extra energy produced from solar panels during the day to avoid using electricity at a more expensive rate. The peak time-of-use (TOU) rates can be double the price compared to off-peak rates.

At Solar Energy Caribbean, we specialize in providing Grid-tied and Off-Grid solar PV systems with battery storage, ensuring that homes and businesses in Sint Maarten never have to face such disruptions again.

Rapidly scaling up solar PV installations will lower electricity expenses for consumers and increase the reliability of the island's power supply while contributing to St. Maarten's overall sustainability goals, the report concluded.

We currently have six stores. Two in Sint Maarten, one in French St Martin, one in St Lucia and two in Grenada. All are on the water and are easily reached by dinghy. All are easily accessible by road with adequate parking.

Reduce your EDF & GEBE electricity bills, lower your carbon footprint, and gain energy independence with custom solar panel installations, solar battery storage, and EV charging solutions for residential, commercial, and industrial properties.
