

Through the acquisition of ExRes SHC, Dynegy will acquire Sithe Energies, which includes the 1,042 MW, 7,211 Btu heat rate, combined-cycle Independence power generation facility located near ...

Prior to Development Partners, he was a member of the management team that founded Sithe Energies, Inc., where he helped grow the company from 10 to over 2,000 employees and more than \$1 billion in revenue. Sithe evolved into a leading independent power company with over 12,000 MWs in operation in North America and overseas and \$6 billion in ...

The Sithe Global Power management team has successfully developed over 50 power plant projects in nine countries with a capital investment in excess of \$5 billion. CEO Bruce Wrobel helped build the former Sithe Energies, Inc. from a startup in 1986 to one of the largest, most successful independent power producers in the U.S.

Sithe Global Power, LLC, based in New York, NY, is an international development company involved in the construction, acquisition and operation of electric power generation facilities. The company began as Sithe Energies, Inc. in 1968 and has since become one of the largest power producers in the United States.

The Sithe Global team has over 300 years of collective experience in development, construction, and operations of electric generation facilities. Our projects total 3,000 megawatts - a total capital investment potential of nearly \$5 billion and are diversified across energy sources (hydro, gas and coal) providing cost-effective electricity ...

Continuing its effort to gain scale and scope in electric generation, Peco Energy Co. will buy 49.9% of Sithe Energies for \$682 million, with an option to acquire the rest of the company...

Continuing its effort to gain scale and scope in electric generation, Peco Energy Co. will buy 49.9% of Sithe Energies for \$682 million, with an option to acquire the rest of the ...

Sithe Global strives to be among the best in the world at implementing large scale, socially responsible power generation projects, often in places where success has proven challenging. We believe that developing energy projects with a major economic impact while mitigating the ecological footprint is the key to sustainable development.
