

By partnering with Skovgaard Energy on the Idomlund project, Ørsted is entering one of the most strategically advantageous projects to leverage the strong fit between large-scale renewable energy and Power-to-X.

Our goal is to unfold the potential in renewable energy. We accomplish this by establishing new energy production, by storing energy and by refining energy. Skovgaard Energy hopes to create local workplaces, collaborate with various actors, and contribute to the development of sustainability in respect to nature.

Danish partnership comprising, Topsoe, Skovgaard Energy, and Vestas has reached a milestone. Today, the partners officially started construction of the demonstration plant in Lemvig, Denmark, that will produce green ammonia based on ...

At Skovgaard, electrolyzers will be plugged directly into wind and solar power generation, with no battery storage or firming in between. The 10 MW demo plant is billed as an important testing site for assessing how new ammonia reactor technology can successfully fluctuate operations, depending on renewable electricity input.

Northern Mariana Islands . Energy Action Plan . Misty Dawn Conrad and . J. Erik Ness Sponsored . by . the Department of the Interior Office of Insular Affairs . July 2013 . Produced under ...

I oktober 2022 tog Skovgaard Energy de første spadestik til verdens første dynamiske Power-to-Ammoniak (PtA) anlæg. Ikke verdens største anlæg, men verdens ...
