

The task of the brAIn smart battery storage in Embraco is to regulate electricity consumption at the delivery point in order to generate a financial effect from the provision of non-certified ...

Fuergy, a Slovakia-based company providing energy storage and management solutions, has raised EUR16 million (US\$17.4 million) from local private equity firm Pro Partners Holding. The fundraise, announced yesterday (23 January), is aimed at turning Fuergy's smart battery storage product "brAIn" "into a new green investment product and ...

As Slovakia strides towards modernizing its energy infrastructure, Greenbat and Pixii have joined forces to pioneer the first battery storage system certified for primary ...

The task of the brAIn smart battery storage in Embraco is to regulate electricity consumption at the delivery point in order to generate a financial effect from the provision of non-certified ancillary services, and thus reduce total energy costs and carbon footprint of the delivery point.

FUERGY tailors its high-capacity battery storage system brAIn for business customers according to the needs of their electricity production and consumption allowing the system to reach 100 ...

On 3 November 2023, the European Commission approved a Slovak direct grant scheme of EUR 44 million (USD 47 million). The scheme aims to speed up the spread of new battery systems and repower existing hydro-pumped storage facilities to support the transition to a net-zero economy.

As Slovakia strides towards modernizing its energy infrastructure, Greenbat and Pixii have joined forces to pioneer the first battery storage system certified for primary frequency regulation (FCR) in the V4 countries. This collaboration marks a significant ...

Based out of Bratislava, Slovakia's Fuergy Industries is responding to greater domestic demand for smart energy storage. Putting AI to work with the latest commercial battery products can help more households ...

Package legislation to ensure non-discrimination and stop double charging and the RRP will kick-off funding to meet the national energy storage target of at least 30 MW by 2026. The Ministry is involved in the European Battery Initiative aim-ing to achieve cooperation with academia and the private sector, which is only the beginning to help

In a landmark achievement, Wattstor and ENERGE have successfully implemented a cutting-edge 1.5 MW / 1.6 MWh Battery Energy Storage System (BESS) for ancillary services in Slovakia, enhancing the country's grid stability and fostering innovation.

FUERGY tailors its high-capacity battery storage system brAIn for business customers according to the needs of their electricity production and consumption allowing the system to reach 100 percent battery capacity utilisation (compared to the usual 60 percent approx.), and up to 90 percent utilisation of locally produced green energy (compared ...

The task of the brAIn smart battery storage in Embraco is to regulate electricity consumption at the delivery point in order to generate a financial effect from the provision of non-certified ancillary services, and thus reduce total energy costs ...

As Slovakia strides towards modernizing its energy infrastructure, Greenbat and Pixii have joined forces to pioneer the first battery storage system certified for primary frequency regulation (FCR) in the V4 countries. This collaboration marks a significant milestone in enhancing grid stability and integrating renewable energy sources in Slovakia.

On 3 November 2023, the European Commission approved a Slovak direct grant scheme of EUR 44 million (USD 47 million). The scheme aims to speed up the spread of new battery systems ...

Package legislation to ensure non-discrimination and stop double charging and the RRP will kick-off funding to meet the national energy storage target of at least 30 MW by 2026. The Ministry ...

Based out of Bratislava, Slovakia's Fuergy Industries is responding to greater domestic demand for smart energy storage. Putting AI to work with the latest commercial battery products can help more households access cleaner sources of power, for instance by drawing solar electricity automatically into reserve for use when radiation energy is ...
