

How can I save energy and money in Puerto Rico?

Click on Saving Energy and Money below for a list of tips. LUMA supports the integration of renewable energy sources in Puerto Rico. LUMA is in charge of the transmission and distribution components of the electric system while PREPA continues in charge of its generation plants.

How much does electricity cost in Puerto Rico?

The base electricity cost per kilowatt-hour in Puerto Rico for a residential customer is \$0.04944 for the first 425 kWh consumed, and \$0.05564 per kWh after 425 kWh of consumption, with base fee of \$4 which is independent of consumption. Where the majority of the cost in energy comes is in the fuel charge and energy purchase clauses.

Does Luma energy have a power grid in Puerto Rico?

The contract under which LUMA Energy operates the power grid in Puerto Rico was signed after a bid in 2020. In the bid, five different companies participated and only four submitted business proposals. The \$1,500M contract is set to last for 15 years and can be renewed if both parties agree.

Will Luma energy restore power to Puerto Rico's 88,000 customers?

In a lengthy and contentious legislative hearing in the Puerto Rico House of Representatives on Wednesday, Luma Energy President Wayne Stensby and other company officials answered questions from local legislators worried about the company's ability to restore electricity to more than 88,000 power customers who remain in the dark.

Why does Puerto Rico need electricity?

Every day we depend on electricity. We need it to run lights on the roads, produce goods and services, and keep the economy moving. Our job is to provide you with safe, strong, reliable electric service. The transformation of the electric grid, coupled with better services and rapid response, will allow us to live in a better Puerto Rico.

The privatization of Puerto Rico's power grid represents a potential increase in cost for clients, [55] despite rates already having been set to increase as a means to offset the island's debt. [56] Puerto Ricans use, on average, less electricity than citizens in other states of the US, but pay about twice as much for the service.

The contract signed between LUMA Energy and the Puerto Rican government is surrounded by controversy due to lack of transparency - the contract was signed behind closed doors and announced only after the fact, meaning the citizens of the island had no say in it. UTIER lawyer and legal representative Rolando Emmanuelli Jiménez stated, at the time that the contract was made public, that "its reach far extends beyond that which Fortaleza has led the nation to believe." Th...
