A TEC BVI facilitates the transition to renewable energy in the British Virgin Islands and the wider Caribbean region. We are local leaders and pioneers in the development of the micro-grid energy production field.

Honeywell announced it will provide VIElectron, a CB Lorranger Company, its first installment of battery energy storage solutions (BESS) to six solar parks strategically positioned across the U.S. Virgin Islands.

As we transition to renewable energy for all of the Virgin Islands, we will be moving to energy resiliency and energy security for the Virgin Islands. When this project is commissioned, Anegada will have a more reliable supply of electrical energy, and this enhances the resiliency and energy security of Anegada.

Construction has started on a solar plus storage project on the island of Anegada in the British Virgin Islands for a November 2023 commissioning date. The announcement by the Government of the Virgin Islands on 29 December, 2022, said the project combining solar PV and a battery energy storage system has a combined capacity of 2.1MW.

Stand-alone battery energy storage systems provide an innovative solution to mitigate those disruptions by acting as an uninterruptable power supply for one's home or small business. The VIBES program aims to shield the community from the inconveniences of utility outages by reducing the cost barrier to installing stand-alone battery energy ...

Easing the financial hurdles that are barring you from installing an automatic battery backup system at your home or business is the main goal of the VIBES program. VIBES is federally funded through the State Energy Program Bipartisan Infrastructure Law (SEPIL), and is a rebate program that aims to limit the disruption that each power outage ...

The installment of battery energy storage solutions (BESS) in six solar parks across the U.S. Virgin Islands has begun. The solar array and BESS will boost the islands' decarbonization efforts by fulfilling 30% of its energy consumption through renewable sources.

The British Virgin Islands Electricity Corporation (BVIEC) and Power52 executed the contract for the Anegada Hybrid Renewable Energy & Battery Storage System (BESS) Project in November 2021 in the sum of \$4,687,944.72.
