

Green Ltd specializes in providing smart energy solutions for households, addressing the challenges of load shedding and enabling energy independence. Our residential solar solution not only serves as a backup during load shedding but also ...

The solar PV plant is CDB" sixth intervention in the energy sector in Anguilla, and supports the Government of Anguilla" goal of transforming the country into a low carbon economy. The country has set a national target of producing 30 percent of its electricity from renewable sources by 2030 and cutting greenhouse gas emissions.

While generating electricity from solar is a great opportunity for Anguilla, the only practical way to implement solar is by interconnecting with the existing electricity grid. A stable and reliable grid is essential to the feasibility of cheaper power through solar.

As the European market leader, Smart Solar has a long heritage in the manufacture of high quality solar powered lighting. We continue to lead the way in design and innovation, continuing to expand and evolve our portfolio year on ...
