

power The Karavasta solar project was awarded to Voltalia in accordance with Decision no. 349, dated June 12, 2018, of the Albanian Council of Ministers and the competition procedure launched by the Ministry of Infrastructures and Energy on January 21, 2020 with the support of the European Bank for Reconstruction and Development - EBRD.

As a country situated in a region with abundant solar resources, Albania has enormous potential for using solar energy through photovoltaic (PV) systems. With the energy crisis repeating itself over the years, now more than ever is the moment to assess and fully use this opportunity.

The government is working on diversifying the mix with solar power and facilitate the construction of its first wind parks and gas-fired power plants. At least two more major photovoltaic systems are under construction in ...

Along southwestern Albania's coastline, the sun shines bright--warming the 234,828 new solar panels at the Karavasta power station that will be connected to the country's energy grid in the coming weeks.

KARAVASTA, Albania (AFP-Jiji) -- Along southwestern Albania's coastline, the sun shines bright -- warming the 234,828 new solar panels at the Karavasta power station that will be connected to...
