

What is solar land leasing?

Solar land leasing involves granting the rights to develop and operate solar power installations on your land to a solar energy company or developer. Instead of purchasing the land outright, these companies lease the land from you, typically for a long-term period. How does solar land leasing work?

Is a solar land lease right for You?

By leasing land to solar developers, landowners can receive long-term passive income with predictable rates as well as a vast range of other benefits. Learn how a solar land lease might be right for you! What is a Solar Land Lease?

Does leasing land for solar farms pay off?

Landowners and communities throughout North America are seeing first-hand how leasing land for solar farms and other renewable energy projects pays off. Allocating a portion of your land to lease for an energy project opens up a diversified and dependable income stream.

How does a solar lease work?

The solar company conducts feasibility studies to assess the land's potential for solar power generation. If the land meets the requirements, the company will negotiate a lease agreement with the landowner, specifying the lease duration, rental rates, and other terms and conditions. What are the benefits of leasing your land for solar?

Do landowners get paid for a solar project?

The landowner typically receives annual lease payments or in some cases, may even sell a portion of their land for the solar project. The lease payments become a source of passive income for the landowner and help increase the use of clean energy.

What is a pre-lease agreement for a solar farm?

Once a developer approves your land, they offer two possible pre-lease agreement options: Lease option: This option provides the lease terms but gives the developer time to decide whether to commit to a lease with you. For instance, they may need to determine how much land they will ultimately need for the solar farm.
