

Which solar powered generator is right for You?

If you need something portable for a camping trip, then the Jackery 500W might be your best new travel buddy. When deciding what solar powered generator is right for you, consider which types of appliances, tools, and devices you need to charge and how often you'll be without a traditional power source.

What can a solar powered generator charge?

These generators can charge power tools in the shop, laptops for remote work, and personal devices like bluetooth headphones and speakers. A solar-powered generator with a higher power capacity can even power household appliances in the event of a power outage.

What is a solar powered generator?

Solar-powered generators--also called portable power stations--are a growing sector of the power market. I started using these a few years ago and was thrilled with having a clean, efficient charging system that doesn't roar or burn through gas.

Are solar generators eco-friendly?

Harnessing the sun to create backup power is an eco-friendly alternative to fuel-guzzling gasoline or dual-fuel generators. Also called solar "power stations," solar generators feature high-capacity batteries that store energy that can be used to power appliances and digital devices.

Are solar generators portable?

Solar generators are available as both portable generators and backup home generators. Most solar generators are portable, lightweight, and have a built-in handle. The best portable solar generators are used to provide power for construction sites, campers, events, or other settings where access to electricity is limited.

Can a solar powered generator power a house?

A solar-powered generator with a higher power capacity can even power household appliances in the event of a power outage. And the fact that these are solar-compatible means you aren't reliant on the electrical grid to recharge them. What is the best way to charge a generator?
