How much does a solar energy system cost in Lebanon?

But the lack of regulation in the nascent sector also means that prices fluctuate significantly between providers and regions. Samir Haj Ali, a local solar energy systems provider in southern Lebanon, told FRANCE 24 that he charges at least \$2,500 for a modest 5-amp energy system - a price that is out of reach for most Lebanese.

Why is solar power so popular in Lebanon?

That goal of encouraging renewable energy in Lebanon has been aided by the fact that solar power is now the most affordable way to generate electricity around the world. The cost has dropped by more than 90% over the past decade, thanks to rapid technology gains and a glut in solar-panel production.

Why is Lebanon moving to solar power?

The precarious electricity supply has accelerated a shift to solar power. Power cuts in Lebanon have left much of the population grappling with life without electricity. Faced with total blackouts, households and businesses which can afford to are now rapidly shifting to solar powerfor their basic electricity needs.

Where are solar panels located in Lebanon?

Atop several campus buildings at Sagesse University in Furn El-Chebbak,a suburb southeast of Beirut,row upon row of solar panels gleam under the bright afternoon sun. The Catholic university,home to some 3,500 students, is one of the many organizations in Lebanon that have turned to solar power.

Is Lebanon ready for solar energy?

Lebanon has a large amount of land that is appropriate for solar and wind energy and receives roughly 300 days of sunshine annually. But large-scale solar projects designed to harness this resource are lacking. Obeid noted that a large-scale transition to solar energy would need to involve action at the individual, community and municipal levels.

How many solar companies are there in Lebanon?

ME Green was one of the early solar-power companies in Lebanon, but the sector has ballooned, from around 150 registered businesses in 2020 to more than 800today, according to the LCEC's Khoury. These companies work on everything from small household systems--which start at \$2,000 to \$3,500--to projects involving hundreds of panels or more.
