

We offer full end-to-end solar solutions and complete project management from start to finish. Our services include free site analysis, engineering and design services, financing, rebate application, installation, permitting, inspections, monitoring, and ongoing service and maintenance.

Embrace the power of the sun with our efficient solar panel installations. Whether it's for your home or business, we design and install customized systems to help you harness clean and renewable energy while reducing your utility bills.

For a quarter-century, Dynaf has been at the forefront of solar energy solutions in the Caribbean. With strategic locations in Curaçao, Aruba, St. Maarten, and Bonaire, we're uniquely positioned to serve the entire region with unparalleled expertise and local knowledge.

Would you like to know what is possible at your location? Ecofarm Curacao masters the different areas. We have knowledge of the sun, wind and storage. As a distributor Ecofarm Curacao works together with local installers on Curacao. After the inventory check, we will sit down with you to map out your wishes, in order to arrive at an action plan.

We offer full end-to-end solar solutions and complete project management from start to finish. Our services include free site analysis, engineering and design services, financing, rebate application, installation, permitting, inspections, ...

Customized Design: Our partner LURE will create a customized solar panel system tailored to your home's architecture and energy consumption needs. We consider every detail, ensuring optimal performance and aesthetic integration with your home.

Curaçao presents a promising market for solar energy due to its abundant sunshine and the increasing global emphasis and government level commitment to renewable energy. With rising electricity costs and a growing awareness of environmental issues, the demand for solar energy is rapidly expanding in the private and business sector.

An Off-Grid solar installation operates independently from the local energy provider. In this setup, the solar energy generated is consumed directly by the system's users, with any surplus energy being stored in batteries for later use. A Hybrid Solar ...
