

Somali Solar is committed to provide world class Solar systems with first of it's kind in East Africa. Somali Solar is self funded private organization with a history of renewable energy in the United States and Somalia.

Solar energy systems can be categorized into several types: Grid-Tied Systems: These are connected to the local utility grid and can feed excess electricity back to the grid, often receiving credits through net metering. Off-Grid Systems: Independent from the utility grid, these systems typically include batteries and are ideal for remote locations without grid access.
