

What are LED strip lights?

LED strip lights use energy-efficient and long-lasting LED bulbs to bring creative and decorative lighting to any room. While most strip lights are thought of as a colorful way to decorate a space, they can also be a viable option for bringing accent lighting to commercial buildings and residential homes.

How do I choose the best LED strip lights?

Keep in mind the layout and size of the space where you'll be installing the LED strip lights. If you're lining the ceiling of a large room with lighting, select one or more strips with enough length to cover the perimeter. If you need lighting around a small cabinet, desk, or TV stand, a shorter strip light is a better fit.

Do LED strip lights fall off walls?

Positive reviews highlighted the intense brightness, easy installation, and large color range that these LED strip lights had. Negative reviews criticized these LED strip lights for falling off of walls because their adhesive backing wasn't sticky enough. Prices taken at time of publishing.

How do I control an LED strip light?

You can control an LED strip light in a variety of ways, including with a remote control, voice assistant, control box, and mobile app. Most strip lights come with a remote control and control box, but if you're looking for added convenience, you can purchase a smart voice- or app-controlled model.

How long do LED strip lights last?

On average, most LED light bulbs last between 35,000 and 50,000 hours, giving them a lifespan of around four to six years. Are LED strip lights bad for my eyes? Overexposure to the blue light that strip lights emit can disrupt your sleep cycle. In extreme cases, it can damage your eyes. Do LED strip lights raise my electric bill?
