

Who is the EPC contractor?

The EPC contractor is usually appointed by the project developer or the owner (though a company may fulfil more than one of these roles). The data used for the analysis and the table on the left is derived from operating projects of 4MWAC+ on the Wiki-Solar Database, according to these criteria.

What does an EPC service provider do?

As an EPC service provider in the solar sector, we carry out the plant design, purchasing and construction of your solar power plant. As an EPC service provider, we design the plant (Engineering), purchase components and services (Procurement) and construct the power plant (Construction) including the infrastructure.

Who can benefit from solar power?

Industrial companies as well as investment firms and energy suppliers can profit from our experience. Moreover, we can reliably provide energy for mining companies or agricultural businesses with our off-grid solutions. We built the largest solar park in our company's history in northern Greece - the 204-megawatt plant in Kozani.

Do EPCs appoint sub-contractors?

While fulfilling the role of prime contractor, many EPCs will in turn appoint sub-contractors to handle much of the construction work; typically divided between mechanical and electrical activities. The EPC contractor is usually appointed by the project developer or the owner (though a company may fulfil more than one of these roles).

Does Krone Solar offer technical consultancy services for the project Ciorani?

During the project, the Krone Solar team has accomplished all the contractual requirements. We hereby confirm that Krone Solar CEE SRL has offered technical consultancy services for the development stage of the photovoltaic project Ciorani, having a designed installed power of 65 MWp.

Who managed the EPC contract and the commissioning of Axente?

We hereby confirm that Mr. Dan Cirstoc managed the EPC contract and the commissioning of the photovoltaic plant Axente, 2.963 MWp. Responsibilities of Mr. Dan Cirstoc have covered all the requirements of this project.

Our approach is simple: build together as a unified team. We believe that our commitment to excellence will provide our clients with exceptional work and superior craftsmanship for all construction related needs. We are an EPC full ...

As of the third quarter of 2024, SOLV Energy has built 13.6GW of solar PV capacity as an EPC contractor. Image: Brian Doll, SOLV Energy. US engineering, procurement, and construction (EPC ...

Slovenia offers great potential for exploiting photovoltaic energy due to evenly spread solar irradiation. The first photovoltaic power plant in Slovenia was set up in 2001. At the end of 2017, 4,231 photovoltaic power ...

Nobody benefits from these EPC tables, not even the companies at #1 position, if they suspect the analysis was fundamentally flawed from the start. Our new analysis is done purely bottom-up from matching the known and confirmed solar farms - that make up the 5.3GW of installed solar farm capacity - to the lead-EPC that performed the work.

The most successful model employed by EPC-capable companies within the UK solar market has been from those getting involved at the initial planning process (or acquiring approved sites), doing the lead EPC work in-house, and then flipping SPVs to third-party portfolio asset holders. This accounts for almost half of the installed capacity from ...

Our approach is simple: build together as a unified team. We believe that our commitment to excellence will provide our clients with exceptional work and superior craftsmanship for all construction related needs. We are an EPC full-service contractor with an emphasis on quality, safety, and trust.
