

We provide operation and maintenance services (O& M) for solar photovoltaic plants. These services are provided by a team of world-class operators with support from AES El Salvador. Thanks to our global and local experience, we make reliability and timely response available to you, as well as cutting-edge resources in the market.

The USD-7.8-million (EUR 6.4m) solar farm is scheduled to reach commercial operation date (COD) in early 2021. Once online, the plant will operate under a 20-year USD-denominated power purchase agreement (PPA) signed with CAESS, a subsidiary of US energy company AES Corp (NYSE:AES).

AES" Meanguera del Golfo solar plant--the first of its kind in Latin America--relies on enhanced solar-plus-battery storage technology to deliver uninterrupted, carbon-free electricity to isolated island communities and support economic growth in the Gulf of Fonseca region of El Salvador.

Amsterdam/Oslo - 6 February 2023 - MPC Energy Solutions (MPCES) has announced the start of operations for its Santa Rosa and Villa Sol solar photovoltaic (PV) plants in El Salvador, which have a combined installed capacity of 21.3 MW. Santa Rosa and Villa Sol are the third and fourth projects in the Company's portfolio to start operations ...

Between 2015 and 2023, El Salvador experienced a 160-fold increase in its solar energy generation capacity, according to statistics from the Latin American Energy Organization (Olade). This increase is the result of a greater number of solar farms in the territory, which contribute to the energy matrix from their operations.

Amsterdam/Oslo - 6 February 2023 - MPC Energy Solutions (MPCES) has announced the start of operations for its Santa Rosa and Villa Sol solar photovoltaic (PV) plants in El Salvador, which have a combined installed ...

Netherlands-based sustainable energy company MPC Energy Solutions NV (OSE:MPCES) said on Wednesday it had recently inaugurated its two solar farms with a combined capacity of 21.07 MWp in El Salvador.

Bósforo comprises 10 plants of 10 MW each, for a total capacity of 100 MW of energy produced by solar photovoltaic sources, contributing to prevent emissions of more than 175 thousand metric tons of CO2 per year. The investment in the project was of ...
