

What is a solar generator?

A solar generator is a larger version of a portable power bank that can charge and power not only small devices, but nearly all of your electronics and appliances. When most people talk about solar generators, they're often referring to a portable power station that is powered by sunlight.

Do you need a solar generator?

Most solar ready-made generators have enough power to power the average home and cater to your needs. However, if you need to power your entire home or get more power than usual, you'd need to invest in a couple of solar generators to achieve this.

How to choose a solar generator?

Another essential feature that you ought to look at in your selection is the type of solar panel that the solar generator has. Nearly every brand that makes portable power stations (Jackery, Goal Zero, Bluetti, etc.) has an accompanying solar panel as an optional addition.

Are all solar generators the same?

Most solar generators are made to be portable -- designed as a sturdy box that contains the battery, inverter, and the control circuits. On the outside, a solar generator usually has: However, not all solar powered generators are the same and not all generators work with all solar panels.

Why is my portable solar generator not working?

During cloudy days, your portable solar generator panel doesn't get enough direct sunlight. Factor the gray days, especially if you need power for several devices for several days. Ensure the capacity and charge rate will give you enough power for all your needs.

Should you buy a solar powered generator?

In short, you can replace the battery, but a whole unit replacement is more cost-effective. Portable solar-powered generators are effective and good for the environment. You also save funds you would otherwise use to buy fuel continuously. So, solar is the way to go if you want a backup power solution for emergencies.
